

**Assignment 4**  
**Interactivity for your Web application using AJAX**

**Due 11:59pm – Tuesday April 21, 2020**

In this assignment, you will implement **at least two AJAX requests** to update your website. One request can be to an external file (no specific file type required) and the other can be to another website (accessing API data). Your website must be updated based on the data returned from the requests.

Your grade for this submission will be based on the following criteria:

1. The quality of the *layout, style* and *purpose* of the AJAX requests for your specific web application.
2. Demonstrated mastery of AJAX requests.
3. Separation of concerns strictly enforced.
4. Code properly documented and formatted.
5. Successfully upload all your HTML, CSS, JavaScript and image files to the webserver.
7. Successfully submit all your HTML, CSS and JavaScript files (NO IMAGE/VIDEO FILES) as a zip folder on Canvas.
8. Provide a working URL of the home page of your project on the Coments section on Canvas.
9. On the comments section of Canvas, also provide the webpage/s where the Ajax requests are implemented, and the purpose of the AJAX implemnetations.

***N.B. Include in the comments section any additional functionality provided to be eligible for extra credit.***
